

ORTHOSPEC™ COMPACT

Full Spectrum of Orthopedic Applications

Orthospec Compact – Medispec’s innovative, cutting-edge, Extracorporeal Shock Wave Therapy (ESWT) system – is designed for acute and chronic orthopedic pain treatment. Eliminating the need for medication, injections or surgery, this precise, non-invasive treatment is applied directly to the pain source. Based on traditional spark gap technology and unique Medispec patents, Orthospec Compact offers outstanding results and a significant turnaround in acute and chronic orthopedic pain management, with a 90% success rate for chronic indications. The Orthospec Compact is clinically proven, and is designed for orthopedic therapy, sports & rehabilitation medicine.

- Designed for a full spectrum of orthopedic applications
- Comfortable, non-invasive treatment requiring no anesthesia
- Deep focused shock wave penetration
- Short treatment time
- Easily performed in clinics and offices
- User-friendly, intuitive technology
- Compact design and enhanced mobility

Compact, Mobile & Cost Effective

Orthospec Compact joins the Medispec lineup of superior, non-invasive, comfortable, deep penetration orthopedic treatment systems, ensuring a high success rate within a relatively short time frame. It is compact and mobile, making it easy to store and move from room to room.

The system is available in two models, Orthospec Compact and Orthospec Desktop.

The Orthospec Desktop is designed based on Medispec's accumulated experience and expertise, enabling physicians to extend treatment availability to additional small facilities, and at home treatments.

User-Friendly Touch Screen

State-of-the-art touch screen for ease of use, providing full control capabilities.
