MedArt VariMed System is created as laser system in combination with 3D-scanner and cooling system. The MedArt 3D scanner with the ideal weight of 290g places a series of 9 spots each 8mm diameter, within the large 5.7cm² treatment area. Controls on the scanner itself enable the scan pattern to be changed conveniently to a single 8mm spot for treating smaller areas or a line scan of 3 spots for upper lip, etc. The attached sapphire window provides pre, parallel and post treatment cooling to 0 °C. Treatment safety is guaranteed by the effective combination of super long pulse technology and contact cooling.
